

Help Guide 10a

How do I completely remove the FilesThruTheAir™ WiFi Sensor Software from my PC?

What is this?

- This Help Guide refers to the FilesThruTheAir™ WiFi Sensor Software.

How do I completely remove the FilesThruTheAir™ WiFi Sensor Software from my PC?

1. Uninstall the WiFi Sensor Software.

Windows XP/Vista : use **Control Panel | Add or Remove Programs**

Window 7 : use **Control Panel | Programs**

Windows 8 & 10 : search **Programs and Features**.

Locate the WiFi Sensor Software in the list and select Remove or Uninstall.

2. Completely remove the folder **Program Files\Wifi Sensor Software**.
This might be **Program Files (x86)\Wifi Sensor Software** on some operating systems.
3. Completely remove the folder **My Documents\WiFi Sensor Software**.
This might be **Documents\WiFi Sensor Software** on some operating systems.
4. Delete the file **My Documents\config.wft**.
This might be **Documents\config.wft** on some operating systems.

The software and any related data is completely removed.
