**What is this?**

This Help Guide refers to the EL-Enviropad.

Updating the Firmware in my EnviroPad

① Download and install the latest EnviroPad PC software from download.filesthrutheair.com, and install the software on your PC.
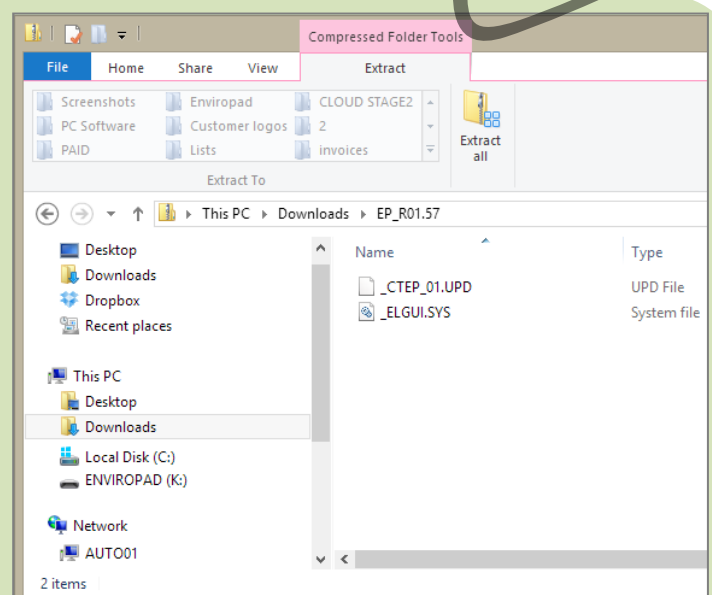

> **EP**
> for Windows XP, Vista, 7 & 8 (including 64-bit)
>
> **Download Software**

② Turn your EnviroPad On and connect it to a USB port on your PC.

③ Download the latest EnviroPad firmware from download.filesthrutheair.com and unzip the file.

EnviroPad firmware is distributed as a zip file containing one or more update files. Simply double click the zip file to open it.
